SUMMARY

Business Central Developer with 3.5+ years of hands-on experience delivering complex ERP solutions for enterprise clients in the port authority and utilities sector. Specialised in end-to-end NAV to Business Central migrations, AL Language development (extensions, financial modules, approval workflows), and bidirectional system integrations via SOAP/OData APIs and BC Web Services. Currently pursuing a Master's in Artificial Intelligence, with a focus on integrating AI-driven automation and analytics into Business Central environments. Open to international and fully remote opportunities.

EXPERIENCE

Business Central / NAV Developer

Oct 2022 – Present

Lāberit · Provincia di Castellón (Remote) · started as an intern, converted to full-time in Feb 2023

- End-to-end NAV to Business Central migrations for enterprise clients in the port authority and utilities sector: requirements analysis, re-engineering of inherited NAV customisations, data migration, go-live and post-production support.
- AL development of custom extensions covering purchasing, contract management, budget control, withholding tax, and sales & purchase invoice management.
- Bidirectional system integrations with external platforms (ERPs, banking systems, portals) via SOAP/OData APIs and BC Web Services; automated XML/CSV file import & export.
- Built approval workflows and process automation tailored to each client's operational model.
- Gathered functional requirements directly from business stakeholders, translating them into scalable BC solutions with ongoing support in live environments.
